Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 September 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Requirement For Information

1. Applicant and the assignee of this application are required under 37 CFR 1.105 to provide the following information that the examiner has determined is reasonably necessary to the examination of this application.
2. In response to this requirement, please state whether any search of prior art was performed. If a search was performed, please state the citation for each prior art collection searched. If any art retrieved from the search was considered material to demonstrating the knowledge of a person having ordinary skill in the art to the disclosed image reproducing apparatus and image reproducing method, please provide the citation for each piece of art considered material and a copy of the art. In addition, if the art considered material is written in applicant's native language, applicant is held to understand the materiality of the art and is required to disclose the materiality. Therefore, for each piece of art considered material that is written in applicant's native language, please identify the portions of the art that were considered material as well as a concise explanation in the English language of the material portions.
3. In response to this requirement, please state whether a rejection was made in a corresponding foreign application. If a rejection was made, please provide a copy of the rejection. For example, if the Japanese Patent Office issued a rejection in one of the corresponding Japanese applications, please submit a copy of the Japanese rejection. As another example, if a corresponding application has been filed in Europe and has received a rejection, please submit a copy of the rejection.

4. This information is relevant to patentability. Applicant is reminded that failure to fully reply to this requirement for information will result in a holding of abandonment. This requirement is an attachment of the enclosed Office action. A complete reply to the enclosed Office action must include a complete reply to this requirement. The time period for reply to this requirement coincides with the time period for reply to the enclosed Office action.

Election/Restrictions

5. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

I Species of the editing apparatus that edits edit material on page 4 of the application which corresponds to claims 1-7.

II Species of the editing apparatus that edits a plurality of pieces of edit material information on page 5 of the specification, corresponding to claims 8-10.

III Species of an image display apparatus on page 6 of the application, corresponding to claims 11-13.

No claim is generic.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. **The reply must also identify the claims readable on the elected species, including any**

claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Species I has a plurality of semiconductor memory insertion units and a control unit for controlling the processing of writing/reading information to/from the semiconductor memories inserted into the plural semiconductor memory insertion units, and for controlling the processing of editing the edit material information, and for controlling the processing of displaying a plurality of images on the display unit. Species II has an input operation unit having a rotational operation means that is rotated to be operated. Species III has a shaft portion that is arranged on extension portions extending from respective corresponding one sides of the main body and the cover, and pivotably couples the main body and the cover around a axis parallel with the respective one sides.
